SECTION 4: First aid measures

4.1 Description of first aid measures

General advice Move out of dangerous area. Take off all contaminated clothing immediately. Do

not leave the victim unattended. Show this safety data sheet to the doctor in at-

tendance.

If inhaled Move to fresh air. If symptoms persist, call a physician. Show this safety data

sheet to the doctor in attendance.

In case of skin contact Wash off immediately with soap and plenty of water while removing all contami-

nated clothes and shoes. If skin irritation occurs, seek medical advice/attention.

In case of eye contact

In the case of contact with eyes, rinse immediately with plenty of water and seek

medical advice.

If swallowed Rinse mouth.Do NOT induce vomiting.Call a physician immediately.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media Carbon dioxide (CO2), Foam, Water spray, Dry powder

Extinguishing media which must not

be used for safety reasons

High volume water jet

5.2 Special hazards arising from the substance or mixture

Special exposure hazards arising from

the substance or preparation it

Hazardous decomposition products formed under fire conditions.

Violent polymerization may be caused by: Extremes of temperature and direct

sunlight.

5.3 Advice for firefighters

Special protective equipment for fire-

fighting

In the event of fire, wear self-contained breathing apparatus.

Additional information on firefighting Fire residues and contaminated fire extinguishing water must be disposed of in

accordance with local regulations.Do not allow run-off from fire fighting to enter

drains or water courses.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions Use personal protective equipment.

Ensure adequate ventilation. Vapours are heavier than air and may spread along

floors.

6.2 Environmental precautions

Environmental precautions Prevent further leakage or spillage if safe to do so.Do not flush into surface water

or sanitary sewer system. Avoid subsoil penetration.

6.3 Methods and material for containment and cleaning up

Methods for cleaning up Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal

binder, sawdust). Clean contaminated surface thoroughly.

6.5 Additional information

Other information Treat recovered material as described in the section "Disposal considerations".

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Advice on safe handling Handle and open container with care. Avoid contact with skin and eyes.

Processing may lead to evolution of flammable volatiles. In case of insufficient ventilation, wear suitable respiratory equipment. Keep product and empty con-

tainer away from heat and sources of ignition.

Precautions Smoking, eating and drinking should be prohibited in the application area. For

personal protection see section 8. Observe label precautions.

7.2 Conditions for safe storage, including any incompatibilities

Storage space and container require-

ments

Keep in properly labelled containers. Containers which are opened must be care-

fully resealed and kept upright to prevent leakage.

Store in accordance with the particular national regulations. Keep in a cool, well-

ventilated place.

TRGS 510

Recommended storage temperature Keep in a dry, cool place.

Advice on protection against fire and

explosion

Take precautionary measures against static discharges. Vapours may form explosive mixture with air. Use water spray to cool unopened containers.

8.2 Exposure controls

Respiratory protection In interiors and during exceeding of the air limit values carrying of protectiv

masks is absolutely necessary.

Use the indicated respiratory protection if the occupational exposure limit is ex-

ceeded and/or in case of product release (dust).

Vapour during processing may be irritating to the respiratory tract and to the eyes. When workers are facing concentrations above the exposure limit they

must use appropriate certified respirators.

Remarks Recommended Filter type: A1, A2 (in case of higher concentration)

Hand protection Protective gloves complying with EN 374.Please observe the instructions regard-

ing permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time.

Unsuitable material woven fabric, Leather gloves, Nitrile rubber

Suitable material butyl-rubber
Material thickness 0,7 mm
Break through time 120 min

Eye protection Tightly fitting safety goggles

Skin and body protection Wear suitable protective equipment.Long sleeved clothing

General protective and hygiene mea-

Handle in accordance with good industrial hygiene and safety practice. Keep away from food, drink and animal feedingstuffs. Wash hands before breaks and at the end of workday. Use protective skin cream before handling the product. Avoid

contact with the skin and the eyes.

Ensure adequate ventilation, especially in confined areas. When workers are fac-**Engineering measures**

ing concentrations above the exposure limit they must use appropriate certified

respirators.
