Classification according to Regulation Flam. Liq. 2; H225 Skin Irrit. 2; H315 Skin Sens. 1; H317 STOT SE 3; H335 (EC) No. 1272/2008

### 2.2 Label elements

Hazard pictogram

Signal word Danger Hazardous component(s) to be indimethyl methacrylate , 2-ethylhexyl acrylate , Fatty acids, C18-unsatd., dimers recated on label action products with N,N-dimethyl-1,3-propanediamine and 1,3-propanediamine H-statement(s) H225: Highly flammable liquid and vapour. H315: Causes skin irritation. H317: May cause an allergic skin reaction. H335: May cause respiratory irritation. P-statement(s) P210: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. P261: Avoid breathing dust/fume/gas/mist/vapours/spray. P264: Wash thoroughly after handling. P280: Wear protective gloves/protective clothing/eye protection/face protection/hearing protection. P312: Call a POISON CENTER/doctor if you feel unwell. P333+P313: If skin irritation or rash occurs: Get medical advice/attention. P362+P364: Take off contaminated clothing and wash it before reuse.

# SECTION 4: First aid measures

### 4.1 Description of first aid measures

General advice	Move out of dangerous area.Take off all contaminated clothing immediately.Do not leave the victim unattended.Show this safety data sheet to the doctor in at- tendance.
If inhaled	Move to fresh air. If symptoms persist, call a physician. Show this safety data sheet to the doctor in attendance.
In case of skin contact	Wash off immediately with soap and plenty of water while removing all contami- nated clothes and shoes.If skin irritation occurs, seek medical advice/attention.
In case of eye contact	In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
If swallowed	Rinse mouth.Do NOT induce vomiting.Call a physician immediately.

# **SECTION 5: Firefighting measures**

# 5.1 Extinguishing media

Suitable extinguishing media	Carbon dioxide (CO2), Foam, Water spray, Dry powder
Extinguishing media which must not be used for safety reasons	High volume water jet

# Exvit

#### 5.2 Special hazards arising from the substance or mixture

Special exposure hazards arising from the substance or preparation it	Hazardous decomposition products formed under fire conditions. Violent polymerization may be caused by: Extremes of temperature and direct sunlight.
5.3 Advice for firefighters	
Special protective equipment for fire- fighting	In the event of fire, wear self-contained breathing apparatus.
Additional information on firefighting	Fire residues and contaminated fire extinguishing water must be disposed of in

drains or water courses.

accordance with local regulations.Do not allow run-off from fire fighting to enter

# **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions	Use personal protective equipment. Ensure adequate ventilation. Vapours are heavier than air and may spread along floors.
6.2 Environmental precautions	
Environmental precautions	Prevent further leakage or spillage if safe to do so.Do not flush into surface water or sanitary sewer system.Avoid subsoil penetration.
6.3 Methods and material for contain	ment and cleaning up
Methods for cleaning up	Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust).Clean contaminated surface thoroughly.
6.5 Additional information	
Other information	Treat recovered material as described in the section "Disposal considerations".

# **SECTION 7: Handling and storage**

# 7.1 Precautions for safe handling

Advice on safe handling	Handle and open container with care. Avoid contact with skin and eyes. Processing may lead to evolution of flammable volatiles. In case of insufficient ventilation, wear suitable respiratory equipment. Keep product and empty con- tainer away from heat and sources of ignition.
Precautions	Smoking, eating and drinking should be prohibited in the application area.For personal protection see section 8.Observe label precautions.
7.2 Conditions for safe storage, inclu	ding any incompatibilities
Storage space and container require- ments	Keep in properly labelled containers.Containers which are opened must be care- fully resealed and kept upright to prevent leakage. Store in accordance with the particular national regulations. Keep in a cool, well- ventilated place.
TRGS 510	3
Recommended storage temperature	Keep in a dry, cool place.
Advice on protection against fire and explosion	Take precautionary measures against static discharges. Vapours may form explo- sive mixture with air. Use water spray to cool unopened containers.

#### 8.2 Exposure controls

Respiratory protection	Use the indicated respiratory protection if the occupational exposure limit is ex- ceeded and/or in case of product release (dust). Vapour during processing may be irritating to the respiratory tract and to the eyes. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.	
Remarks	Recommended Filter type: A1, A2 (in case of higher concentration)	
* Hand protection	Protective gloves complying with EN 374.Please observe the instructions regard- ing permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time.	
Unsuitable material	woven fabric, Leather gloves, Nitrile rubber	
Suitable material	butyl-rubber	
Material thickness	0,7 mm	
Break through time	120 min	
Eye protection	Tightly fitting safety goggles	
Skin and body protection	Wear suitable protective equipment.Long sleeved clothing	
General protective and hygiene mea- sures	Handle in accordance with good industrial hygiene and safety practice.Keep away from food, drink and animal feedingstuffs.Wash hands before breaks and at the end of workday.Use protective skin cream before handling the product.Avoid contact with the skin and the eyes.	
Engineering measures	Ensure adequate ventilation, especially in confined areas. When workers are fac- ing concentrations above the exposure limit they must use appropriate certified respirators.
